Specialist cleaning & maintenance services for urban spaces

Paving Cleanse

Specialist cleaning & maintenance services for urban spaces

Hardscape work in conjunction with specialist cleaning providers, to ensure your access to reliable, trusted providers of services to ensure maximum lifespan from your paving & façades.

Our Services

Post-Construction Cleaning

With construction activities on site having potential to grind dirt and grime into surfaces or leave stubborn residue from mortar / joint compound, you'll want to ensure that the final stages of presenting your investment are undertaken by experts.

Utilising van mounted, hot, low-pressure, non-contact rotary cleaners, we deliver deep and effective cleaning even on delicate materials, with efficiency, safety and noise reduction, for minimal disruption to the surrounding area (we even recover & recycle the water for compliance with environmental regulations).

Maintenance Programmes

We can establish a cost-effective cleaning regimen, with biocides for locations where green surface growth is an issue, that will present your paving & facade investment at its best. This improves public perception of your space, increasing footfall, dwell times and revenue for surrounding commerce, while removing the need for costly deep cleans in years to come.

Stain Removal

For established areas, footfall and other traffic can diminish the surface appearance over time. Chewing gum and other detritus bringing a unique challenge to existing street cleaning services.

Our high temperature, deep cleaning process can be quickly applied to any location, for the smallest spaces through to expansive schemes, returning everything to pristine condition.

Protective Treatments

While the our expert advisors here at Hardscape ensure you've the right material for your location, providing products with a long lifespan, you may choose to further protect your space with surface treatments.

Adding breathable, protective treatments to reduce stone porosity for high traffic areas, can reduce future cleaning needs or minimise your needed maintenance schedule, all without affecting the beautiful, natural materials you've chosen.

Drone Surveys

Ensuring you target your cleaning and maintenance needs, and confirm the results for quality control, can often require further external services, but we take care of everything. A drone survey and report are undertaken for all sites before, during and after completion of works, for total peace of mind.

Before & After

Hardscape choose **Stone Cleaning Specialists** as our trusted supplier for cleaning services across the UK.

- **Proven expertise** in making the most of your location.
- **Quick and easy**, we take care of everything, with minimal disruption.
- **Environmentally conscious** with efficient water recycling.
- **Peace of mind** both from our drone surveys, and professional reputation.
