NET

Net is a reinforced concrete element that has the dual function of a litter bin and ashtray in a clear reference to traditional ceramic vases. Thanks to its formal characteristics, Net represents the paradigm of a more sensual approach to objects moulded in concrete, and can be integrated naturally into any environment.

Concrete | ∅ 45 cm | 155 kg | 40 L

Update 20.11.2025

Diego Fortunato 2005

NET

ORIGIN

Net was designed as a complement to the Sit bench, with the objective of creating rounded site furnishings that are cannot be associated with any historical period.

VERSATILITY

It has a dual function and can be used as both a bin and an ashtray. The Net litter bin has a telescopic system concealed inside it with a ring for attaching the waste bag that is easy to handle and requires no maintenance. If the Net is used as an ashtray, it must be filled with sand to a height that allows a cigarette to be extinguished and the ash to fall into the bin.

MATERIAL

Moulded concrete with an etched finish and in the Escofet standard chart colour. Stainless steel ring to secure the bag in place.

INSTALLATION

Concealed installation by means of three threaded bolts with a rustproof protective finish in holes previously drilled in the paving and filled with epoxy resin or rich mortar.
